**EVERLIGHT introduces Smart Lighting at Taiwan International Lighting Show**

*Multi-function LED bulbs and intelligently controlled streetlights will demonstrate at the TILS 2015 to show how LED lighting makes life more convenient*

**Shulin District, New Taipei City (2015.03.24)** – EVERLIGHT founded the brand "EVERLIGHT LIGHTING" to provide the superior LED lighting products and services to customers. A variety of intelligently controlled lamps, 60Z bulbs and streetlights will be announced first time at 2015 Taiwan International Lighting Show, along with European-style residential lighting to answer customer demands. EVERLIGHT LIGHTING not only delivers outstanding energy saving performance, but also offers more convenience in life and fun with smart control features.

The SL-60Z bulb series truly complies with Energy Star requirements and features the lighting effect, high quality and wide angle especially needed for three types: dimmable, sensor built-in and Bluetooth.

The "dimmable type" is suitable for traditional home appliances. The "sensor built-in type" can automatically turn on and off by sensing the moving object and smart control using a smart phone. The "Bluetooth type" can also adjust brightness, color temperature and scenario via mobile device according to the consumer's desire.

In addition, SL-60Z bulbs not only have good heat dissipation due to thermal radiation, but are also equipped with an LED module designed for excellent thermal management. The manufacturing process for SL-60Z bulb series fully conforms to RoHS, and complies with CNS, IEC and many certificates.

In terms of street lighting, EVERLIGHT LIGHTING not only demonstrated new generations of the Dolphin and Victory series in beautiful appearance and good efficiency, honored by 2012 and 2013 Taiwan Excellence Awards respectively. The company also insisted that the products be manufactured in Taiwan and introduced "Intelligent Lighting Service", where a monitoring module will regularly send information to a cloud system to monitor the lighting service, the status of streetlight and fault display. It is expected to fasten the maintenance process and enhance the citizen's satisfaction with streetlight. Intelligent Dolphin and Victory streetlights can be equipped with multi-color LEDs to change the color of appearance, and the color effect can be adjusted according to the different demands and events.

Furthermore, EVERLIGHT LIGHTING will also demonstrate commercial lighting, office lighting, home lighting, and industrial lighting at TILS 2015 to fully show the advantages of a comprehensive yet diversified production line, including our European-style residential lighting (brand name: WOFI), which

can provide the total solution and the most complete service for customers.
